The Stranger in the Woods

Many people dream of escaping modern life, but most will never act on it. This is the remarkable true story of a man who lived alone in the woods of Maine for 27 years, making this dream a reality—not out of anger at the world, but simply because he preferred to live on his own. A New York Times bestseller In 1986, a shy and intelligent twenty-year-old named Christopher Knight left his home in Massachusetts, drove to Maine, and disappeared into the forest. He would not have a conversation with another human being until nearly three decades later, when he was arrested for stealing food. Living in a tent even through brutal winters, he had survived by his wits and courage, developing ingenious ways to store edibles and water, and to avoid freezing to death. He broke into nearby cottages for food, clothing, reading material, and other provisions, taking only what he needed but terrifying a community never able to solve the mysterious burglaries. Based on extensive interviews with Knight himself, this is a vividly detailed account of his secluded life—why did he leave? what did he learn?—as well as the challenges he has faced since returning to the world. It is a gripping story of survival that asks fundamental questions about solitude, community, and what makes a good life, and a deeply moving portrait of a man who was determined to live his own way, and succeeded.

Meet Ove. He's a curmudgeon--the kind of man who points at people he dislikes as if they were burglars caught outside his bedroom window. He has staunch principles, strict routines, and a short fuse. People call him "the bitter neighbor from hell." But must Ove be bitter just because he doesn't walk around with a smile plastered to his face all the time? Behind the cranky exterior there is a story and a sadness. So when one November morning a chatty young couple with two chatty young daughters move in next door and accidentally flatten Ove's mailbox, it is the lead-in to a comical and heartwarming tale of unkempt cats, unexpected friendship, and the ancient art of backing up a U-Haul. All of which will change one cranky old man and a local residents' association to their very foundations. A feel-good story in the spirit of *The Unlikely Pilgrimage of Harold Fry* and *Major Pettigrew's Last Stand*, Fredrik Backman's novel about the angry old man next door is a thoughtful exploration of the profound impact one life has on countless others. "If there was an award for 'Most Charming Book of the Year,' this first novel by a Swedish blogger-turned-overnight-sensation would win hands down" (Booklist, starred review).

Were it not for a few quirks of history, St. Louis might have become the center of the American automotive industry instead of Detroit. Since the late 1800s, St. Louis has been home to dozens of automobile makes and to numerous manufacturers, large and small. In *They Will Run: The Golden Age of the Automobile in St. Louis*, head down the road of automotive history in the Gateway City, where transportation has always meant power. Many St. Louisans have heard of the famous Moon automobile of the early twentieth century, but what about the Dyke, the Dorris, and the Gardner? Learn about the city's prominence as a key automobile manufacturing hub through the 1960s, and the role played by notorious St. Louis playboy and bon vivant Harry Turner in bringing the automobile to St. Louis. Do you know which vehicles produced here helped the Allies win World War II? Or which ones helped carry and sell beer, create the legend of America's first true sports car, or were raced around ovals and across the country? Dig down under the roads to uncover the previous lives of streets that once served as Automobile Rows lined with beautiful buildings in which to buy or repair cars. Authors and car enthusiasts Molly Butterworth and Tom Eyssell deftly take the wheel of this in-depth guide to the automotive heritage of St. Louis. Sit back and enjoy the ride, from the horseless carriage, through the halcyon 1920s, and up to the everchanging automobile industry of today.

house presents a selection of the most breathtaking models and tells their stories. It might only take a slight turn of the ignition, but firing up classic cars also makes great moments in automobile history come to life. Every page of *Gentlemen, Start Your Engines!* gives the reader a sense of the intensity of true automobile culture. Large-format images showcase sleek shapes and tactile vintage interiors in loving detail. The book was compiled by Jared Zaugg, a man who founded one of the coolest high-end motorcycle events in the world, the Legend of the Motorcycle: International Concours d'Elegance. Although Zaugg has mostly been associated with two-wheelers, in *Gentlemen, Start Your Engines!* he revels in his second passion--double the number of wheels and double the fun! In cooperation with Bonhams, the largest auction house for classic cars, Jared Zaugg reveals the undeniable icons of the scene. The book features a selection of models that go far beyond mere technical stats and gleaming chrome. Rather, they all offer something far more valuable: unique stories. These include the legendary Hurst Baja that Steve McQueen drove in an off-road race through the desert outside Las Vegas in 1968 until its axle broke. Or the famous Bugatti Brescia Tyre 22 from 1915 that lay on the bottom of Lake Maggiore for over 70 years before its remains were recovered in 2009. Then there are classic beauties such as the Aston Martin DB4GT, as well as a collection of historical vehicles that call to mind the origin of the word "horsepower" and the automobile's humble beginning as a noble carriage. All the big names are included, but the focus is on what can be found behind the logos and the polished surfaces. With its striking photographs and compelling texts, *Gentlemen, Start Your Engines!* truly captures the feeling of these unique cars. As lovers of exclusive limited series, record-making vehicles, and legendary races themselves, Jared Zaugg and the team at Bonhams went all out in their efforts to collect the best of the best in this publication--and it shows. *Gentlemen, Start Your Engines!* is a book that celebrates cars. While it will inspire some to dream and fuel envy in others, it offers superb stories for everyone.

The founders of a respected Silicon Valley advisory firm study legendary category-creating companies and reveal a groundbreaking discipline called category design. Winning today isn't about beating the competition at the old game. It's about inventing a whole new game—defining a new market category, developing it, and dominating it over time. You can't build a legendary company without building a legendary category. If you think that having the best product is all it takes to win, you're going to lose. In this farsighted, pioneering guide, the founders of Silicon Valley advisory firm Play Bigger rely on data analysis and interviews to understand the inner workings of "category kings"—companies such as Amazon, Salesforce, Uber, and IKEA—that give us new ways of living, thinking or doing business, often solving problems we didn't know we had. In Play Bigger, the authors assemble their findings to introduce the new discipline of category design. By applying category design, companies can create new demand where none existed, conditioning customers' brains so they change their expectations and buying habits. While this discipline defines the tech industry, it applies to every kind of industry and even to personal careers. Crossing the Chasm revolutionized how we think about new products in an existing market. The Innovator's Dilemma taught us about disrupting an aging market. Now, Play Bigger is transforming business once again, showing us how to create the market itself.

A dynamically illustrated exploration of 70 years of automotive design in the Motor City Detroit, nicknamed Motor City, has always been a leader in car design. As the city became the center of the American automobile industry in the early 20th century, its studios became incubators for new ideas and new styles. This volume highlights the artistry and influence of Detroit designers working in the industry between 1950 and the present day, giving readers a sumptuously illustrated opportunity to discover the ingenuity of influential (and surprisingly little-known) figures in postwar American car design. Detroit Style showcases 12 coupes and

sedans, representing both experimental cars created solely for display and iconic production models for the mass market. Dozens of design drawings and images of studio interiors--along with paintings and sculptures--highlight the creative process and dialogue between the American art world and car culture. These materials in addition to interviews with influential figures in car design today bring new insights and spark curiosity about the formative role Detroit designers have played in shaping the automotive world around us, and the ways their work has responded to changing tastes, culture, and technology.

The Catcher in the Rye

THE INSIDE STORY OF THE EPIC TURNAROUND OF FORD MOTOR COMPANY UNDER THE LEADERSHIP OF CEO ALAN MULALLY. At the end of 2008, Ford Motor Company was just months away from running out of cash. With the auto industry careening toward ruin, Congress offered all three Detroit automakers a bailout. General Motors and Chrysler grabbed the taxpayer lifeline, but Ford decided to save itself. Under the leadership of charismatic CEO Alan Mulally, Ford had already put together a bold plan to unify its divided global operations, transform its lackluster product lineup, and overcome a dysfunctional culture of infighting, backstabbing, and excuses. It was an extraordinary risk, but it was the only way the Ford family—America's last great industrial dynasty—could hold on to their company. Mulally and his team pulled off one of the greatest comebacks in business history. As the rest of Detroit collapsed, Ford went from the brink of bankruptcy to being the most profitable automaker in the world. American Icon is the compelling, behind-the-scenes account of that epic turnaround. On

the verge of collapse, Ford went outside the auto industry and recruited Mulally—the man who had already saved Boeing from the deathblow of 9/11—to lead a sweeping restructuring of a company that had been unable to overcome decades of mismanagement and denial. Mulally applied the principles he developed at Boeing to streamline Ford's inefficient operations, force its fractious executives to work together as a team, and spark a product renaissance in Dearborn. He also convinced the United Auto Workers to join his fight for the soul of American manufacturing. Bryce Hoffman reveals the untold story of the covert meetings with UAW leaders that led to a game-changing contract, Bill Ford's battle to hold the Ford family together when many were ready to cash in their stock and write off the company, and the secret alliance with Toyota and Honda that helped prop up the American automotive supply base. In one of the great management narratives of our time, Hoffman puts the reader inside the boardroom as Mulally uses his celebrated Business Plan Review meetings to drive change and force Ford to deal with the painful realities of the American auto industry. Hoffman was granted unprecedented access to Ford's top executives and top-secret company documents. He spent countless hours with Alan Mulally, Bill Ford, the Ford family, former executives, labor leaders, and company directors. In the bestselling tradition of *Too Big to Fail* and *The Big Short*, *American Icon* is narrative nonfiction at its vivid and colorful best.

In the history of planning, the design of an entire community prior to its construction is among the oldest traditions. *Iconic Planned Communities and the Challenge of Change* explores the twenty-first-century fortunes of planned communities around the world. Drawing on interdisciplinary perspectives, the editors and contributors examine what happened to planned communities after their glory days had passed and they became vulnerable to pressures of growth, change, and even decline. Beginning with Robert Owen's industrial village in Scotland and concluding with Robert Davis's neotraditional resort haven in Florida, this book documents the effort to translate optimal design into sustaining a common life that works for changing circumstances and new generations of residents. Basing their approach on historical research and practical, on-the-ground considerations, the essayists argue that preservation efforts succeed best when they build upon foundational planning principles, address landscape, architecture, and social engineering together, and respect the spirit of place. A book examining the strange terrain of Nazi sympathizers, nonintervention campaigners and other voices in America who advocated on behalf of Nazi Germany in the years before World War II. Americans who remember World War II reminisce about how it brought the country together. The less popular truth behind this warm nostalgia: until the attack on Pearl Harbor, America was deeply, dangerously divided. Bradley W. Hart's *Hitler's American Friends* exposes the homegrown antagonists who sought to protect and promote Hitler, leave Europeans (and especially European Jews) to fend for themselves, and elevate the Nazi regime. Some of these friends were Americans of German heritage who joined the Bund, whose leadership dreamed of installing a stateside Führer. Some were as bizarre and hair-raising as the Silver Shirt Legion, run by an eccentric who claimed that Hitler fulfilled a religious prophesy. Some were Midwestern Catholics like Father Charles Coughlin, an early right-wing radio star who broadcast anti-Semitic tirades. They were even members of Congress who used their franking privilege—sending mail at cost to American taxpayers—to distribute German propaganda. And celebrity pilot Charles Lindbergh ended up speaking for them all at the America First Committee. We try to tell ourselves it couldn't happen here, but Americans are not immune to the lure of fascism. *Hitler's American Friends* is a powerful look at how the forces of evil manipulate ordinary people, how we stepped back from the ledge, and the disturbing ease with which we could return to it.

(Book Jacket Status: Jacketed) When it was published in 1955, "Lolita" immediately became a cause célèbre because of the freedom and sophistication with which it handled the unusual erotic predilections of its protagonist. But Vladimir Nabokov's wise, ironic, elegant masterpiece

owes its stature as one of the twentieth century's novels of record not to the controversy its material aroused but to its author's use of that material to tell a love story almost shocking in its beauty and tenderness. Awe and exhilaration-along with heartbreak and mordant wit-abound in this account of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. Lolita is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America, but most of all, it is a meditation on love-love as outrage and hallucination, madness and transformation. Some of the most dapper men in the world discuss bad mustaches, misguided cologne choices, and unfortunate prom tuxedos. All the men here have arrived at a place in the world and have a keen understanding about how they fit in it. Men and Style celebrates singular men who've lived well and can tell us about how they earned their worldview. They're smart enough to absorb the wisdom that's hidden in the world, and even smarter to wear that wisdom lightly.

The Yugo

Jaguar is a beautifully photographed guide to the best Jaguar sports and saloon cars stretching back to the pre-war roadster, the SS100. Featuring specially commissioned photography, the book is arranged in chronological order, starting with Sir William Lyons' nascent marque of the 1930s. It was only after the war when the work of aerodynamicist Malcolm Sayer created the beautiful curves of the XK120 that the company became a world beater. The D-type brought the company sporting success at Le Mans, leading to a car that became emblematic of London in the swinging 60s, the E-type Jaguar. Production increased in the 1960s with the Mark I and Mark II saloons, latterly adopted by Inspector Morse. The Silk Cut Jaguar XJR-9 repeated the Le Mans success in the 1980s, but it was the sale of the company to Ford in 1990 that produced new models, the retro-styled S-type saloon and the E-type inspired XK8 sports car. Sold to Tata Motors in 2008, the company has gone on to release more premium sportscars and prestige saloons, the Jaguar XF, the new XJ-series and the much-desired Jaguar F-type R.

My Dad Had That Car

With an introduction by novelist David Vann Jon Krakauer's *Into the Wild* examines the true story of Chris McCandless, a young man, who in 1992 walked deep into the Alaskan wilderness and whose SOS note and emaciated corpse were found four months later. Internationally bestselling author and mountaineer Jon Krakauer explores the obsession which leads some people to discover the outer limits of self, leave civilization behind and seek enlightenment through solitude and contact with nature. In 2007, *Into the Wild* was adapted as a critically acclaimed film, directed by Sean Penn and Emile Hirsch and Kristen Stewart.

A Man & His Car

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's *Car Talk* declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

All Played Out

Man-about-town and NYC men's style fixture Matt Hranek is back with his second book, *A Man & His Car*. Here is a beautiful homage to an object of men's obsession, told in firsthand and original interviews. Jay Leno, a major car collector and the host of *Jay Leno's Garage*, shares the story of his oldest car, a 1955 Buick Roadmaster that he bought for \$350, which he literally slept in before getting his break in L.A. Kevin Costner reveals that he got so attached to the iconic Shelby Mustang he drove in the movie *Bull Durham*, he bought it for his own personal collection. Franz von Holzhausen, chief designer at Tesla, who worked hand in hand with Elon Musk to design the Tesla Model S prototype, says that his love of cars started when he was two (as evidenced by a picture of him sitting in a high chair drawing a car). And as for Snoop Dogg and his 1965 Cadillac "Snoop DeVille" convertible—do we even need to explain? *A Man & His Car* includes visits to some of the most exclusive collections in the world—from that of the Petersen Automotive Museum to those of car manufacturers from Fiat to Ford—giving us access to Steve McQueen's favorite car, a 1956 Jaguar XKSS; the 1971

DeTomaso Pantera that Elvis purchased for his then-girlfriend Linda Thompson (and which has two bullet holes in the steering wheel and one in the driver's-side floorpan from when, after an altercation with Thompson, Presley fired three rounds into the interior when the car wouldn't start); and a super-rare, 24-karat-gold-plated 1980 DeLorean DMC-12, a model that was sold exclusively to American Express Gold Card members through the 1980 American Express catalog, for an astronomical \$85,000 (equivalent to more than \$250,000 today). Exquisite photos of each car accompany each story, and since cars naturally hold more detail than watches, there will be more photos in this book—of the cars head-on, of their hood ornaments and wheels, and of course full-body shots. With Hranek's storytelling, the cars become more than just vehicles for transportation and status symbols; they represent pop-culture moments, pioneering achievements, heirlooms, friendships, and more.
