### Basics Fashion Design 05: Fashion Drawing

This enlightening study explores the set design drawings for theatre and live performance, highlighting their unique qualities within the greater arena of drawing practice and theory. The latest volume in the Drawing In series, *Scenographic Design Drawing* encourages an interdisciplinary dialogue in the field of drawing with the inclusion of illustrations throughout. Scenographic design drawings visualize the images in the designer's 'mind's eye' early in the design process. They are the initial design tool in the creative engagement with theatre, opera, dance, and non-text-based performance. It is, in particular, this body of drawings that is unique as both a performative and a theatrical representation of multiple worlds within the 'stage space'. Sue Field illuminates this illustration process and identifies how these drawings have functioned and developed over time. *Scenographic Design Drawing* serves to satisfy an emerging global curiosity and a thirst for new knowledge and understanding in relation to the drawings executed by the historical and contemporary scenographer. This work addresses a critical research gap and shows how the scenographic design drawing continues to be a principal site of innovation, subjectivity,

originality and authorship in theatre and live performance.

Interior design is a multidiscipline profession blending spatial, technical and aesthetic knowledge. The skill involved in manipulating these elements to solve specific design problems is intrinsically linked to drawing. Interior Design Drawing explores all aspects of this vital design skill, from sketching to record information, through orthographics and development to analyse the problem, to presentation drawing to communicate the solution. Explore the role of drawing in the design process; understand the main orthographic drawings; use line, tone and colour across 2D and 3D drawings; add texture and atmosphere to drawings; consider aspects of composition and presentation of a set of drawings; an overview of how drawing relates to the process of interior design. This guide covers sketching to record information, elevation and projection, and making final presentation drawings to communicate solutions to clients. Fully illustrated with over 100 colour illustrations. Alan Hughes has an MA in Interior Architecture and has taught at undergraduate and post-graduate levels for many institutions.

### Drawing and Designing with Confidence

In the early days of the digital revolution in graphic design, many designers and teachers of design were

convinced that the era of drawing on paper was over--that there would soon no longer be a place for craft-based drawing at any stage of the design process. It soon became apparent, however, that technological progress had not obviated the inherent value of drawing, and that, in fact, it opened up new avenues for convergent and hybrid drawing practices. This book traces the evolution of design-based drawing through analysis of a series of research projects from the 1980s to recent years that have sought to characterize the changing practices of design within various industries. Built on more than three hundred interviews with designers, academics, and design students, and an exhaustive analysis of thousands of drawings, it aims to generate discussion around historical and contemporary models of the design process.
