constraints resulted in an energetic and inventive session. Read More.  
Teenagers Experiment with Glow in the Dark Paint and Rice

### **Designing With Light: The Art, Science and Practice of**

LED light sources are designed to produce light in specific parts of the visible spectrum. Most LED's do not produce any infrared or ultraviolet light, so generally LED's are a good light source to use for lighting artwork. That said, because they produce light at particular wavelengths, the way they render colour is not always as good as conventional light sources. (Read to our blog on
