In Japanese gardens, composition follows from placement of the first stone; all elements and plantings become interconnected. These eight essays on Kyoto gardens similarly begin with keen description and build into richly meditative excursions into art, Buddhism, nature, and science. Landscape architect Marc Keane shows how Japanese gardens are both a microcosm of the natural universe and a clear expression of our humanity, mirroring how we think, worship, and organize our lives and communities. Filled with passages of alluring beauty, this is a truly transcendent book about "experiencing" Japanese design. Marc Peter Keane has lived in Kyoto for 17 years and is author of Japanese Garden Design. He designs residential, company, and temple gardens.

The Architectural Drawing Course

For children with a passion for drawing, or dreams of creating buildings, this book explores how architects really work, taking the young reader through the entire process for planning and designing a house. Learn about an architect's four main drawings: the Site Plan, Floor Plan, Section, and Elevation—including the concept of drawing each plan to scale. Aspiring architects discover design techniques, along with different, exciting architectural styles used today. All of this is brought to life in freehand, pen-and-ink architectural drawings that will inspire children to apply these lessons to their own designs. This book is the perfect introduction to architecture, revealing why buildings look and function as they do. While this creative book is ideal for the middle grades, ages 9-12, even adults will find it inspiring.

The debate surrounding hand drawing versus computer-generated imagery has become a hot topic. Having grown up with computers, today's interior design and architecture students are extremely adept at creating computer imagery, but often lack confidence in their freehand sketching skills, or do not know how to sketch at all. Sketching, and the careful observation that it entails, is essential for the successful development of the next generation of designers. Forty-five step-by-step exercises take the student from the simple three-dimensional forms of furniture, to interiors, to complex building exteriors and cityscapes. Technical topics covered include tools, line weights, perspective, proportion, composition, shading, serial views, and context. Exercises are illustrated with beautiful sketches specially created by the author. Sketching for Architecture and Interior Design is an indispensable and practical guide for students wishing to master the art of looking and sketching.
