## **Modern Lettering**

"Writing by hand may seem passé in the digital age, but it shouldn't be dismissed as simply an activity for grade-schoolers-it offers countless benefits that have been studied by researchers, brain neurologists, therapists, educators, and others who are invested in helping handwriting thrive in an age of advancing technology. Handwriting may be slower than typing-but this gives your brain more time to process information, and stimulates neurological connections that aid in memory, focus, and composition. The process of handwriting can also have a soothing, calming effect and can even serve as a great form of meditation. And of course, it's a great way of expressing your individuality and personal style."
