In 1943, Albert Schatz, a young Rutgers College Ph.D. student, worked on a wartime project in microbiology professor Selman Waksman's lab, searching for an antibiotic to fight infections on the front lines and at home. On his eleventh experiment on a common bacterium found in farmyard soil, Schatz discovered streptomycin, the first effective cure for tuberculosis, at that time the world's leading killer disease. As director of Schatz's research, Waksman took credit for the discovery, belittled Schatz's work, and secretly enriched himself with royalties from the streptomycin patent filed by Merck, the pharmaceutical company. In an unprecedented lawsuit, young Schatz sued Waksman, was awarded the title of "co-discoverer" and a share of the royalties. But two years later, Professor Waksman alone was awarded the Nobel Prize. Schatz disappeared into academic obscurity. For the first time, acclaimed author and journalist Peter Pringle reveals the scandals behind one of the most important discoveries in the history of medicine. The story unfolds on a tiny college campus in New Jersey, but its repercussions spread worldwide. The streptomycin patent was a breakthrough for the drug companies, overturning patent limits on products of nature and paving the way for today's biotech world. As dozens more antibiotics were found, many from the same family as streptomycin, the drug companies created oligopolies and reaped big profits. Pringle uses first-hand accounts and archives in the U.S. and Europe to unravel the intensely human story behind the discovery that started a revolution in the treatment of infectious diseases and shaped the future of Big Pharma

When analyzing 7-Eleven Japan's advanced and innovative management style, the authors of this book explore and highlight the existence of the "integrated information system", a symbol of the competitiveness of 7-Eleven Japan. This is because of the key role it plays not only in forming 7-Eleven Japan's corporate strategy but also in developing its functional strategies for logistic support, merchandising and store operations.

The letters that Ezra Pound wrote to William Watt from 1956-58 are published for the first time, offering an unusual and perhaps unique

degree of insight into an aspect of the poet that is otherwise little known: his interest in, and acquaintanceship with, modern architecture and city-planning. His expression of this interest involved advising Watt on the founding of the journal Diapason, later Agora, which was to be devoted to literature inspired by city and urban life, and to the discussion of cities themselves. These letters also add to what is already known about Pound's mentoring activities and capacities where "les jeunes" were concerned. Like any such collection, they offer a taste of his epistolary style and of the personality that underlay it: kind, devoted to the art of poetry, prejudiced, choleric, merry and facsimile. Since the present collection appears to be the first set of letters printed in its entirety, it's the first to give full evidence that Pound's ellipses and his idiosyncratic spelling, punctuation and typing, in general, held true throughout his correspondence, some readers may find their interest quickened for this reason.--[pg.1].

For Australia the First World War remains the most costly conflict in terms of deaths and casualties. From a population of fewer than five million, 416,809 men enlisted, of which over 60,000 were killed and 156,000 wounded, gassed, or taken prisoner. In general terms with Australian unit histories the quality of authorship is very good, most of them share the common strength of making plentiful mention of the individual officers and men who served, fought, died, was wounded, or taken prisoner, or who came safely home at the end of it all. They are a prime source for genealogists and military historians.
