Featuring the novels: Wild at Heart, Perdita Durango, Sailor's Holiday, Sultans of Africa, Consuelo's Kiss and Bad Day for the Leopard Man The Wild Life of Sailor and Lula presents Gifford's best prose work as he originally conceived it: six inter-locking novels which chart the riotous and stormy lives of Sailor Ripley and Lula Pace Fortune - the horribly likeable, sex-driven, star-crossed lovers immortalised in David Lynch's movie Wild at Heart. Masterful with dialogue, and always

with infinite patience, but also a writer with great powers of observation and expression. Brilliant!' ALAN TITCHMARSH  
\_\_\_\_\_ From Gavin Thurston, the award-winning Blue Planet II and Planet Earth II cameraman with a foreword by Sir David Attenborough comes extraordinary and adventurous true stories of what it takes to track down and film our planet's most captivating creatures. Gavin has been a wildlife photographer for over thirty years. Against a backdrop of modern world history, he's lurked in the shadows of some of the world's remotest places in order to capture footage of the animal kingdom's finest: prides of lions, silverback gorillas, capuchin monkeys, brown bears, grey whales, penguins, mosquitoes - you name it he's filmed it. Come behind the camera and discover the hours spent patiently waiting for the protagonists to appear; the inevitable dangers in the wings and the challenges faced and overcome; and the heart-warming, life-affirming moments the cameras miss as well as capture.

mom and dad agreed they wouldn't take so many risks. Jack agreed he'd try to live life without worrying quite so much. Then Jack's parents thought up another get-rich-quick scheme. Now the family's driving around Kenya. An animal attack is about to send Jack up a tree?alone, with limited supplies. As Jack attempts to outsmart a ferocious honey badger and keep away from an angry elephant, he'll have plenty of time to wonder if the Berenson Family Decision-Making Rules did enough to keep him out of trouble.

## **The Wild Life of the Domestic Cat**

"I adore the fox for its magnificence; I hate the fox for killing my chickens. To love and loathe the fox is a British condition." The fox is our apex predator, our most beautiful and clever killer. We have witnessed its wild touch, watched it slink by bins at night and been chilled by its high-pitched scream. And yet we long to stroke the tumbling cubs outside their tunnel homes and watch the vixen stalk the cornfield. There is something about foxes. They captivate us like no other species. Exploring a long and sometimes complicated relationship, *The Wild Life of the Fox* captures our love - and sometimes loathing - of this magnificent creature in vivid detail and lyrical prose.

## Life of Christ

Don't Let's Go to the Dogs Tonight meets Mean Girls in this funny, insightful fish-out-of-water memoir about a young girl coming of age half in a "baboon camp" in Botswana, half in a ritzy Philadelphia suburb. Keena Roberts split her adolescence between the wilds of an island camp in Botswana and the even more treacherous halls of an elite Philadelphia private school. In Africa, she slept in a tent, cooked over a campfire, and lived each day alongside the baboon colony her parents were studying. She could wield a spear as easily as a pencil, and it wasn't unusual to be chased by lions or elephants on any given day. But for the months of the year when her family lived in the United States, this brave kid from the bush was cowed by the far more treacherous landscape of the preppy, private school social hierarchy. Most girls Keena's age didn't spend their days changing truck tires, baking their own bread, or running from elephants as they tried to do their schoolwork. They also didn't carve bird whistles from palm nuts or nearly knock themselves unconscious trying to make homemade palm wine. But Keena's parents were famous primatologists who shuttled her and her sister between Philadelphia and Botswana every six months. Dreamer, reader, and adventurer, she was always far more

comfortable avoiding lions and hippopotamuses than she was dealing with spoiled middle-school field hockey players. In Keena's funny, tender memoir, *Wild Life*, Africa bleeds into America and vice versa, each culture amplifying the other. By turns heartbreaking and hilarious, *Wild Life* is ultimately the story of a daring but sensitive young girl desperately trying to figure out if there's any place where she truly fits in.

*Wild Life* documents a nuanced understanding of the wild versus captive divide in species conservation. It also documents the emerging understanding that all forms of wild nature—both in situ (on-site) and ex situ (in captivity)—may need to be managed in perpetuity. Providing a unique window into the high-stakes world of nature conservation, Irus Braverman describes the heroic efforts by conservationists to save wild life. Yet in

the shadows of such dedication and persistence in saving the life of species, Wild Life also finds sacrifice and death. Such life and death stories outline the modern struggle to define what conservation should look like at a time when the long-established definitions of nature have collapsed. Wild Life begins with the plight of a tiny endangered snail, and ends with the rehabilitation of an entire island. Interwoven between its pages are stories about golden lion tamarins in Brazil, black-footed ferrets in the American Plains, Sumatran rhinos in Indonesia, Tasmanian devils in Australia, and many more creatures both human and nonhuman. Braverman draws on interviews with more than one hundred and twenty conservation biologists, zoologists, zoo professionals, government officials, and wildlife managers to explore the various perspectives on in situ and ex situ conservation and the blurring of the lines between them.

## **Hunting - Philosophy for Everyone**

The New York Times bestselling author of *First, We Make the Beast Beautiful* tackles the loneliness epidemic, encouraging readers to view solitude through a spiritual lens, and embrace the art of being alone. This is not just a book for single people, introverts, or the self-proclaimed lone wolf.

You can be in a crowded room, or at a dinner table with your spouse and children, and still feel powerfully lonely and disengaged. Forty-six percent of Americans sometimes or always feel lonely, and loneliness is a public health hazard that rivals alcoholism, smoking, and obesity. Meanwhile, as our cultural sense of disconnection grows, our endless drive for "more" - more social media, more technology, overconsumption, workaholism - grows too. But what if we were to shut off our devices and simply sit with ourselves in what Wilson calls "radical aloneness?" Could this be the antidote to the profound sense of disconnection that we feel? In the voice-driven style that built a community around her last book, Wilson embarks on a personal and spiritual journey that is destined to become a movement.

### **Life of Sir Walter Scott**

"We walked toward the part of the library where the air smelled as if it had been interred for years.... Finally, we got to the hallway where the wooden floor was the creakiest, and we sensed a strange whiff of excitement and fear. It smelled like a creature from a bygone time. It smelled like a dragon." Thirteen-year-old Juan's favorite things in the world are koalas, eating roast chicken, and the summer-time. This summer, though, is off to a terrible start. First,

Juan's parents separate and his dad goes to Paris. Then, as if that wasn't horrible enough, Juan is sent away to his strange Uncle Tito's house for the entire break! Uncle Tito is really odd: he has zigzag eyebrows; drinks ten cups of smoky tea a day; and lives inside a huge, mysterious library. One day, while Juan is exploring the library, he notices something inexplicable and rushes to tell Uncle Tito. "The books moved!" His uncle drinks all his tea in one gulp and, sputtering, lets his nephew in on a secret: Juan is a Princeps Reader--which means books respond magically to him--and he's the only person capable of finding the elusive, never-before-read Wild Book. Juan teams up with his new friend Catalina and his little sister, and together they delve through books that scuttle from one shelf to the next, topple over unexpectedly, or even disappear altogether to find The Wild Book and discover its secret. But will they find it before the wicked, story-stealing Pirate Book does?

## **The Wild Life**

This book provides an insight into the diversity of the animal kingdom, showing how insects, reptiles, birds and mammals have learned to survive in wild and dangerous conditions. Learn about the extraordinary skills animals possess and the many ways in which they sense and escape from danger, hunt for food, give birth and care for their young. Find out how animals communicate with each other, and about their family lives, and how they have adapted to the effects of man's interference in their natural habitats.

## **Life of the Wild**

The Wild Life is John Lewis-Stempel's account of twelve months eating only food shot, caught or foraged from the fields, hedges, and brooks of his forty-acre farm. Nothing from a shop and nothing raised from agriculture. Could it even be done? We witness the season-by-season drama as the author survives on Nature's larder, trains Edith, a reluctant gundog, and conjures new recipes. And, above all, we see him get closer to Nature. Because, after all, you're never closer to Nature than when you're trying to kill it or pick it. Lyrical, observant and mordantly funny, The Wild Life is an extraordinary celebration of our natural heritage, and a testament to the importance of getting back to one's roots - spiritually and practically.

### **Wild and Precious Life**

In the name of progress and clean living, we scrub much of nature off our bodies and try to remove whole kinds of life—parasites, bacteria, mutualists, and predators. To modern humans, nature is the landscape outside. Biologist Rob Dunn contends that while "clean living" has benefited us in some ways, it has also made us sicker in others.

We are trapped in bodies that evolved to deal with the dependable presence of hundreds of other species. This disconnect from the web of life has resulted in unprecedented effects that immunologists, evolutionary biologists, psychologists, and other scientists are only beginning to understand. Diabetes, autism, allergies, many anxiety disorders, autoimmune diseases, and even tooth, jaw, and vision problems are increasingly plaguing bodies that have been removed from the ecological context in which they existed for millennia. Dunn considers this crossroads at which we find ourselves. Through the stories of visionaries, Dunn argues that we can create a richer nature, one in which we choose to surround ourselves with species that benefit us, not just those that, despite us, survive.
