will not get upset because of the crayon behind the lines ☑ Designed to be painted with crayons, markers and paints. Thanks to the extra-thick paper and the one-sided spacing between the illustrations, no colour can break through to the other side., ☑ You will discover how your child's senses are trained and how they can use them at school to get better grades and praise, ☑ Careful coloring of a picture in a painting can require a lot of work, time and patience on the part of the child and is an excellent training for concentration, ☑ Introduction to learning to write: As well as learning how to hold the crayon well and put it in place, the child learns how to coordinate properly by finding the colour it needs. In turn, tempering the crayon, he trains small motor skills. These activities will make it easier to use a pen and pencil efficiently while learning to write.
