Sacred Natural Sites

From St. Peter's Basilica in Rome to Notre-Dame in Paris, Christian churches represent some of our most significant architectural achievements, designed to evoke wonder and awe. Offering unprecedented access to a collection of revered religious landmarks, photographer Guillaume de Laubier takes readers on a stunning architectural tour.

Ebook PDF Format Sacred Spaces The Awe Inspiring Architecture Of Churches And Cathedrals

Sacred Spaces showcases breathtaking photographs of extraordinary churches and cathedrals, revealing original, illuminating views of icons, such as la Sagrada Familia in Barcelona, while also shedding light on lesser-known sites, such as Saint Basil's Cathedral in Moscow. Whether Catholic, Protestant, or Orthodox; made of wood, stone, concrete, or glass; Roman, Gothic, Baroque, or modern, the places of worship featured in this richly produced volume present an extraordinary overview of our architectural and cultural history.

Cathedrals of the World

Robert A. Scott explores why medieval people built Gothic cathedrals, how they built them, what conception of the divine lay behind their creation and the social and political uses made of cathedrals by religious and secular leaders.

Denise Crown's eye opens up profound connections with the natural world around us. As W.H. Auden once said of E. M. Forster, she "trips us up like an unnoticed stone" as we stumble through the unaware routines of our lives. "Look "

she says, coaxing us to see more deeply and rewardingly into the comradeship of the woods-and she does so in a manner more than merely visual: Her insight operates on a spiritual plane, hinting at richer meanings in these connections. And she offers compelling remarks from other men and women, as diverse as Vincent van Gogh and Albert Einstein, who have understood the wisdom of nature to further deepen the emotional impact of her compelling photographs-now yours to enjoy.

The Most Beautiful Universities in the World

Who is depicted in that stained glass window? What is the significance of those geometric figures? Why are there fierce-looking beasts carved amidst all that beauty? Is there a deeper purpose behind the play of light and space in the nave? Why is there a pelican on the lectern and ornate foliage on the pillars? The largely illiterate medieval audience could read the symbols of churches and cathedrals and recognise the meanings and stories deliberately encoded into them. For worshippers these were places of religious education and an awe-inspiring feast that satisfied both the senses and the soul. Today, in an age less attuned to iconography, such places of worship are often seen merely as magnificent works of architecture. This book restores the lost spiritual meaning of these fine and fascinating buildings. The Secret Language of Churches & Cathedrals provides a three-part illustrated key by which modern visitors can understand the layout, fabric and decorative symbolism of Christian sacred structures - thereby bringing back to life their original atmosphere of awe and sanctity. Part One is an analysis of structural features, outside and in, from spires and domes to clerestories and brasses. Part Two is a theme-by-theme

guide, which identifies significant figures, scenes, stories, animals, flowers, and the use of numbers, letters and patterns in paintings, carvings and sculpture. Part Three is a historical decoder, revealing the evolution of styles - from basilicas through Byzantine, Romanesque, Gothic and beyond. For all those who seek to know more about Christian art and architecture, this richly illustrated book will instruct and delight in equal measure.

Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats (India), Sagarmatha /Chomolungma (Mt Everest, Nepal, Tibet - and China), the Golden Mountains of Altai (Russia), Holy Island of Lindisfarne (UK) and the sacred lakes of the Niger Delta (Nigeria). The book illustrates that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

the globe that have been graced by the brushes of great artists including Michelangelo, Marc Chagall and Cy Twombly. From the floating women and lotus flowers of the Senso-ji Temple in Japan, to the religious iconography that adorns places of worship from Vienna to Istanbul, all the way to bold displays like the Chihuly glass flora suspended from the lobby of the Bellagio Hotel in Las Vegas: this book takes you on a tour of the extraordinary artworks that demand an alternative viewpoint. History of art expert Catherine McCormack guides you through the stories behind the artworks – their conception, execution, and the artists that visualised them. In many cases, these artworks also make bold but controlled political, religious or cultural statements, revealing much about the society and times in which they were created. Divided by these social themes into four sections – Religion, Culture, Power and Politics – and pictured from various viewpoints in glorious colour photography, tour the astounding ceilings of these and more remarkable locations: Vatican Palace, Rome, Italy Blenheim Palace, Oxfordshire, UK Louvre Museum, Paris, France Dali Theatre-Museum, Figueres, Catalonia Museum of the Revolution, Havana, Cuba Capitol Building, Washington, DC, USA Four eight-page foldout sections showcase some of the world's most spectacular ceilings in exquisite detail. First and foremost, this is a visual feast, but also a desirable art book that challenges you to seek out fine art in more unusual places and question the statements they may be making.

By tracing the artistic vocabulary, techniques and working methods of icon painters in the last 400 years, Tarasov shows how icons have been integral to the history of Russian art, influenced by folk traditions and Western European currents alike.

We All Have Sacred Spaces

Throughout the history of the built environment there has been no more significant endeavor than the construction of houses of worship, which were once the focal point around which civilizations and city-states developed. Constructing the Ineffable is the first book to examine this topic across continents and from the perspective of multiple faiths, including Christianity, Judaism, Islam, and Baha'i. It addresses how sacred buildings such as churches, mosques, synagogues, and memorials are viewed in the context of contemporary architecture and religious practice. Featuring more than a dozen essays by a broad range of leading international architects, historians, and theologians, Constructing the Ineffable offers a fundamental exploration of defining and understanding contemporary sacred spaces. This thought-provoking book also invites readers to consider the powerful influence of religion on civic life and to discuss the role that design and construction play in religious buildings.

Religion in Essence and Manifestation

The Victorians built tens of thousands of churches in the hundred years between 1800 and 1900. Wherever you might be in the English-speaking world, you will be close to a Victorian built or remodelled ecclesiastical building. Contemporary experience of church buildings is almost entirely down to the zeal of Victorians such as John Henry Newman, Henry Wilberforce and Augustus Pugin, and their ideas about the role of architecture in our spiritual life and well-being. In *Unlocking the Church*, William Whyte explores a forgotten revolution in social and architectural history and in the history of the Church. He details the architectural and theological debates of the day, explaining how the Tractarians of Oxford and the Ecclesiologists of Cambridge were embroiled in the aesthetics of architecture, and how the Victorians profoundly changed the ways in which buildings were understood and experienced. No longer mere

receptacles for worship, churches became active agents in their own rights, capable of conveying theological ideas and designed to shape people's emotions. These church buildings are now a challenge: their maintenance, repair or repurposing are pressing problems for parishes in age of declining attendance and dwindling funds. By understanding their past, unlocking the secrets of their space, there might be answers in how to deal with the legacy of the Victorians now and into the future.

Secrets of Sacred Space

Churches and Cathedrals

Because he was big and strong and sometimes slow to speak, Thomas Aquinas's schoolmates called him the Dumb Ox. Not long afterward, he came to be called Doctor (which means "teacher") because he could actually understand complicated things quickly and explain them well. Which is what he loved to do, preaching often and writing in the course of his lifetime no fewer than eighty-five works of philosophy and theology books that changed the Church and the world. Indeed, in 1320, less than fifty years after Thomas died, Thomas's biographer said that "throughout the entire world Thomas's teachings have spread among the faithful, and the whole Church is instructed by his voice." Today, the Church Herself calls Saint Thomas Aquinas the Angelic Doctor ("the teacher who is like an angel"): pure, strong, close to God, and truly a messenger of divine light. Scholar he was, but to those who knew him, Saint Thomas gave not only beautiful sermons and books, but also his heart, his devotion, and his love. Initially written for children, but a delight for grownups as well, these pages show the beauty and holiness that belonged especially to Saint Thomas Aquinas, the man of learning who was also a man of God: the patron saint of all those, young and old, who love the truth with their whole hearts, and who wish to know and serve it well.

nonetheless invested with great spiritual and memorial value. In this book, Cynthia Hahn offers the first full survey in English of the societal value of reliquaries, showing how they commemorate religious and historical events and, more important, inspire awe, faith, and, for many, the miraculous. Hahn looks deeply into the Christian tradition, examining relics and reliquaries throughout history and around the world, going from the earliest years of the cult of saints through to the post-Reformation response. She looks at relic footprints, incorrupt bodies, the Crown of Thorns, the Shroud of Turin, and many other renowned relics, and she shows how the architectural creation of sacred space and the evocation of the biblical tradition of the temple is central to the reliquary's numinous power. She also discusses relics from other traditions—especially from Buddhism and Islam—and she even looks at how reliquaries figure in contemporary art. Fascinatingly illustrated throughout, this book is a must-read for anyone interested in the enduring power of sacred objects.

crystal chandeliers and gilt-framed mirrors, a marble bust flanked by eighteenth-century Louis XV rattan chairs, or floral-embroidered Chinese tapestries paired with a mother-of-pearl-inlaid armoire. Modern interiors incorporate mod Tulip chairs, geometric Calder-esque mobiles, and vibrant-hued polycarbonate dining sets. A passion for collecting comes to the fore through taxidermy, tribal arts, Slavic textile motifs, 1950s domestic design pieces, or expertly grouped photographs. Designer and artist abodes exude an irrepressibly creative vibe, from kitsch playland to 1940s boudoir lounge. Romantic interiors include powdered palettes and Provençal fabrics or plush velvet couches and a whitewashed pine buffet. Guillaume de Laubier leads us into the private realm of the Parisian design elite, chez Jacques Garcia, Vanessa Bruno, Jacques Grange, Agatha Ruiz de la Prada, Pierre et Gilles, or the late fashion muse Loulou de la Falaise. His photographs capture sleek Scandinavian lines, traditionalist opulence, modernist curves, and exotic accents, documenting each unique interior with flair.

Sacred Spaces

Jeanne Halgren Kilde's survey of church architecture is unlike any other. Her main concern is not the buildings themselves, but rather the dynamic character of Christianity and how church buildings shape and influence the religion. Kilde argues that a primary function of church buildings is to represent and reify three different types of power: divine power, or ideas about God; personal empowerment as manifested in the individual's perceived relationship to the divine; and social power, meaning the relationships between groups such as clergy and laity. Each type intersects with notions of Christian creed, cult, and code, and is represented

Ebook PDF Format Sacred Spaces The Awe Inspiring Architecture Of Churches And Cathedrals

spatially and materially in church buildings. Kilde explores these categories chronologically, from the early church to the twentieth century. She considers the form, organization, and use of worship rooms; the location of churches; and the interaction between churches and the wider culture. Church buildings have been integral to Christianity, and Kilde's important study sheds new light on the way they impact all aspects of the religion. Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice, church buildings are, in Kilde's view, dynamic participants in religious change and goldmines of information on Christianity itself.

Spiritual Places

There are many books that explore actual, physical, sacred space and pilgrimage sites. This is a different kind of book. It introduces seven traditional 'sacred spaces' but then leads readers into a deeper reflection on what such 'sacred space' means in our own lives and experience. The various sacred spaces explored are: the Celtic Cross; the infinite knot; hilltops; wells and springs; causeways and bridges; thresholds and burial grounds; and boundaries. In each chapter, the author introduces a 'sacred space' as the main theme and then illustrates this by associating it with a particular stage of life and a particular sacramental experience. The ideas are then brought together by means of a scripture story.
