The new generation of scholars differs in many ways from its predecessor of just a few decades ago. Academia once consisted largely of men in traditional single-earner families. Today, men and women fill the doctoral student ranks in nearly equal numbers and most will experience both the benefits and challenges of living in dual-income households. This generation also has new expectations and values, notably the desire for flexibility and balance between careers and other life goals. However, changes to the structure and culture of academia have not kept pace with young scholars' desires for work-family balance. *Do Babies Matter?* is the first comprehensive examination of the relationship between family formation and the academic careers of men and women. The book begins with graduate students and postdoctoral fellows, moves on to early and mid-career years, and ends with retirement. Individual chapters examine graduate school, how recent PhD recipients get into the academic game, the tenure process, and life after tenure. The authors explore the family sacrifices women often have to make to get ahead in academia and consider how gender and family interact to affect promotion to full professor, salaries, and retirement. Concrete strategies are suggested for transforming the university into a family-friendly environment at every career stage. The book draws on over a decade of research using unprecedented data resources, including the Survey of Doctorate Recipients, a nationally representative panel survey of PhDs in America, and multiple surveys of faculty and graduate students at the ten-campus University of California system..

So, what would Mary Ann do? As the sweet, polite, and thoughtful Mary Ann Summers from Kansas in the hit series *Gilligan's Island*, Dawn Wells created an unforgettable and beloved character that still connects with people fifty years from the show's debut in 1964. As the "good girl" among the group of castaways on a tiny island, she was often positioned against the glamorous and exotic Ginger Grant, played by Tina Louise, prompting many to ask: Are you a Ginger or a Mary Ann? This book not only helps readers answer that question for themselves but also sends the inspirational and heartwarming message that yes, good girls do finish first. Part self-help, part memoir, and part humor—with a little classic TV nostalgia for good measure—*What Would Mary Ann Do?* contains twelve chapters on everything from how Mary Ann would respond to changes in today's culture to addressing issues confronting single women and mothers. Wells brings along her fellow characters from *Gilligan's Island* to illustrate certain principles, such as incorporating the miserly Thurston Howell III (Jim Backus) in a discussion on money. Anecdotal sidebars also describe fascinating facts and compelling memories from the show, as well as some trivia questions to challenge fans and followers. Illustrated with photographs from Wells's private collection, this book provides inspiring lessons from TV's favorite good girl.

Inside Gilligan's Island

Ellie counted the days on the kitchen calendar. October 2nd was a Saturday. Twenty-one days until Jimmy had to go. That was a long time. Maybe the war would be over by then. But the days slipped by as fast as the trees shed their leaves. And the war didn't end. Ellie hates the stars proudly displayed in her neighbours' windows: a blue one for every man gone to serve in the war, a gold one for every man who will never return. She doesn't want a star – all she wants is for her big brother Jimmy to stay safely at home. But then Jimmy is called up, and Ellie can only desperately hope that his star never turns gold. Shakespeare have been uninterested by his tyrants as such. But for Shakespeare, rather than a historical curiosity or psychological aberration, tyranny is a perpetual political and human problem. Mary Ann McGrail's recovery of the playwright's perspective challenges the grounds of this modern critical silence. She locates Shakespeare's expansive definition of tyranny between the definitions accepted by classical and modern political philosophy. Is tyranny always the worst of all possible political regimes, as Aristotle argues in his *Politics*? Or is disguised tyranny, as Machiavelli proposes, potentially the best regime possible? These competing conceptions were practiced and debated in Renaissance thought, given expression by such political actors and thinkers as Elizabeth I, James I, Henrie Bullinger, Bodin, and others. McGrail focuses on Shakespeare's exploration of the conflicting and contradictory passions that make up the tyrant and finds that Shakespeare's dramas of tyranny rest somewhere between Aristotle's reticence and Machiavelli's forthrightness. Literature and politics intersect in *Tyranny in Shakespeare*, which will fascinate students and scholars of both.

Bodenheimer defines the personal paradoxes that helped to shape Eliot's fictional characters and narrative style. Bodenheimer revisits pivotal episodes in Mary Ann Evans's life and career, including the "Holy War" through which she asserted her youthful religious skepticism; her decision to elope with the married writer George Henry Lewes; and her marriage with John Cross after Lewes's death. Despite outliving him by 68 years, Mary Ann McCracken's legacy is overshadowed by that of her more famous brother, executed United Irishman Henry Joy McCracken. She was, however, an abolitionist, a social reformer and an activist who fought for the rights of women and Belfast's poor throughout a long life that encompassed the most turbulent years of Irish history. As treasurer, secretary and chair of the Ladies Committee, she helped girls from the Poor House learn crafts that would provide them with livelihoods. Dedicated to championing Belfast's poor, she was President of the Ladies Industrial School and she campaigned to abolish the use of climbing boys in chimney sweeping. Mary Ann was involved in early women's suffrage campaigns and prison reform schemes and was a passionate member of the Women's Abolitionary Committee. In her late eighties, she could be found on the docks, handing out anti-slavery leaflets to emigrants embarking for the slave-owning United States. Reviewing the use of natural light by architects in the era of electricity, this book aims to show that natural light not only remains a potential source of order in architecture, but that natural lighting strategies impose a usefully creative discipline on design. Considering an approach to environmental context that sees light as a critical aspect of place, this book explores current attitudes to natural light by offering a series of in-depth studies of recent projects and the particular lighting issues they have addressed. It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic, climatic and cultural contexts.
